

LINE CV

CODEX VISCOUS VASELINE OIL

APPLICATIONS

Cosmetic, pharmaceutical and phytosanitary industries :

- as a component, strictly within pharmacopoeia: production of creams, ointments, lotions and aperients.

Food industries :

- for the lubrication of mixing, slicing, wrapping, cutting machines for which Codex oil is advised.
- European Directive 95/2/EC **does not allow the use of white oils as direct alimentary additive:** emulsifying agent, anti-binding...
- **to use some material as technological auxiliary** (that is to say as material which may come in contact with food during its production), **one must have received the previous agreement of the DGCCRF.**

Plastic industries :

- plasticizing machine for objects destined to food contact: the only oils authorized by European Directive 1999/91/EC are those which kinematic viscosity at 100°C is superior to 8.5 cSt.

BENEFITS

Highly refined liquid and viscous paraffin oil in conformity with Pharmaceutical Codex and with the specifications of European pharmacopoeia.

Particularly destined to the lubrication of materials which may come in contact with food.

PERFORMANCES

APPROVAL (1)

NSF H3 (n°171210)

MEETS THE REQUIREMENTS

FDA (section 21 CFR 172.878 and 178.3620a)
French CODEX and European
(edition 1997) pharmacopoeias.
(Except packaging 125 ml)
Absorbance U.V. 260/420 nm : less than 0,1.

Nonfood Compounds
H3

(1) Approval certificate available on request
