

SOLV'CLEANER B 45

DEGREASER SOLVENT HIGH EVAPORATION SPEED

APPLICATIONS

SOLV'CLEANER B 45 is an odourless hydrocarbon **CHLORINE-FREE** solvent, used for degreasing mechanical parts of all metal types.

SOLV'CLEANER B 45 is used for cleaning machined parts and machine tools, tooling and working areas as well as all electrical equipment.

SOLV'CLEANER B 45 takes effect by immersion, circulation or sprinkling. Used in a cleaning fountain, it is most effective as it is used at its maximum of saturation.

BENEFITS

- Low content of aromatic hydrocarbons and lack odour assure maximum protection to the user.
- High evaporation speed
- Excellent degreasing and evaporation qualities assure degreasing mechanical parts in **inter-operation** and in **finishing** as well as **tooling**.

Do not contain chlorine and all halogens component : reduced costs of used products

CHARACTERISTICS

CHARACTERISTICS	UNITS	METHODS	TYPICAL DATA
Colour	-	Visual	Colourless
Kinematic viscosity at 20°C	mm ² /s	NF T 60-100	1,17
Relative evaporation speed (n-butyl acétate =1)	-	ASTM D3539	0,18
Specific gravity at 20°C	Kg/m ³	NF T 60-101	750
Flash point	°C	NF T 60-118	42
Aniline point	°C	NF M 07021	78

This typical data is given for information only

HEALTH, SAFETY AND ENVIRONMENT

Inflammable product.

A noxious product that may attack the lungs if it is ingested, do not vomit.

Avoid any contact with the skin and do not inhale the vapours.

Take precautions necessary to use of a product which closed cup flash point is included between 21°C and 55°C.

Disposal after use must be carried out in compliance with the legislation in force.

Must be stored away from bad weather.
